

Do you live or visit the Boston Area?

Schlesinger Associates-Boston, a national market research company, is currently looking for patients who have been diagnosed with **Scleroderma or other Connective Tissue Disease, who either have pulmonary hypertension or who are regularly screened for it**, to participate in an upcoming paid market research study.

We are interested in learning about the experiences of these patients with their care and treatment.

Participation would involve taking part in a 60-minute one-on-one interview with a professional moderator and you would be compensated ***\$150*** for your time and opinions.

These interviews are taking place Friday, July 30th in our Boston office. Parking is also validated, and travel expenses within the Boston area will be reimbursed. Spouses and companions are welcome to accompany you and wait in our comfortable lounge with refreshments provided.

A short telephone conversation will confirm whether or not you qualify. Absolutely no sales are involved and all information is kept strictly confidential.

**If interested please call Katherine at
617-542-5500 x310.**
